REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The instant application discloses a method and apparatus for multi-selection signal detection. A search of prior art records has failed to teach a method comprising the step of; "herein, in the phase adjustment of step B, when the number of the phase adjustments is P, performing the phase rotation of $\phi = \phi_0 + k * 2\pi / p, (k = 0 \dots P - 1) = 4$), on the signals respectively", along with the remaining limitations of claim 2. The prior art also fails to teach a multi-selection coherent detection device; " wherein the output of the matched filter is sent to the branch selection unit via the multiplier, and the adder in turn; and an adjustment series of four bits is sent to the multiplier via the holder, an output of the adder is fed back to its input via the delay unit " along with the remaining limitations of claim 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
